24-4-05 1440 R/C 4 Med Evel: IP is 48 y.o. on psychotropics intermittently x 8 yrs for (CC) "sleep and mood changes...swings...and violence, a little." IP denies hx suicide attempts, current SI or HT. IP reports he has mood swings "when I can't have my way." IP notes this is his first term for assault & a deadly weapon. "Ever since then, I've been in a bad mood." He notes improving mood since starting on Prozac almost 1 month ago. Appetite is fine, sleep at 4-5 hours of Jergas. DOC - ZTOH (2-3 40oz beers). IP is feeling tired & "no motivation at all." IP reports hearing his name being called and peripheral shadows, no true AH or VH. IP notes hypervigilance which he calls paranoid, but is more consistent at a sense of entitlement. IP also reports hypomanic episodes, but appears to be discussing better times & true mood swings. Thinking focused on the inequities of the legal system & his perceived right to reclaim items which he reports were taken from him. Page # 1 of 2

IP denies dx suicide attempts, current SI or HI. IP reports he has mood swings "when I can't have my way." IP notes this is his first term for assault & a deadly weapon. "Ever since then, I've been in a bad mood." He notes improved mood since starting on Prozac almost 1 month ago. Appetite is fine, sleep at 4-5 hours of Sognar. DOC - Zoloft (2-3 400mg beers). IP is feeling tired & "no motivation at all." IP reports hearing his name being called and peripheral shadows, no true AH or VH. IP notes hypervigilance which he calls paranoia, but is more consistent & sense of entitlement. IP also reports hypomanic episodes, but appears to be dissociative better times & true mood swings. Thinking focused on the inequities of the legal system & his perceived right to reclaim items which he reports were taken from Page # 1 of 2
